ambIT® electronic infusion therapy systems are simple to use, safe and offer a wide range of flexibility and customization. To program the pump to your patient's needs, just follow the steps below.

CLEAR HISTORY (HX0):

IMPORTANT: History must be cleared prior to programming a pump for a new patient.

On the PAUSE ⏸ screen, hold BOLUS 🎵 until you hear a beep, release, and immediately hold BOLUS 🎵 until you hear a second beep.

PROGRAMMING A PUMP:

1. On the PAUSE ⏸ screen, simultaneously hold BOLUS 🎵 and RUN/PAUSE ⏯ until you hear a beep.

2. Select type of infusion.

   a. For PCA Pump, continue to next step.

   b. For PreSet Pump, select a PreSet program or PRO5 (Set Own).

   c. For PIB/PCA Pump or PIB/IL, select PCA, PIB, or P+P.

3. Press the RUN/PAUSE ⏯ to increase or BOLUS 🎵 to decrease values as you program.

4. Hold RUN/PAUSE ⏯ to confirm number.
   Note: *Simultaneously, hold RUN/PAUSE ⏯ and BOLUS 🎵 to quickly confirm and move to next screen.*

Programming Screen Order

	Internal Limit*	Basal Rate	Intermittent Bolus Dose	Intermittent Bolus Lock Out	PCA Bolus Volume	PCA Lock Out	Infusion Volume
PCA Pump		1			2	3	4
PreSet Pump set to PRO5		1			2	3	4
PIB/PCA Pump set to PCA		1			2	3	4
PIB/PCA Pump set to PIb			1	2			3
PIB/PCA Pump set to P+P			1	2	3	4	5
PIB/IL Pump set to P+P	1		2	3	4	5	6

Note: The Internal Limit maximum medication volume that will be dispensed over the Intermittent Bolus Lock Out Time.

ADD OR REMOVE PATIENT LOCK OUT

1. On the PAUSE ⏸ screen, simultaneously hold BOLUS 🎵 and RUN/PAUSE ⏯ until you hear a beep, release, and simultaneously press BOLUS 🎵 and RUN/PAUSE ⏯ .

2. Enter Patient Lock Out Code of your choice.
   Note: *An icon 🔒 will be present on the screen once a Patient Lock Out is active.*

REVIEW HISTORY (HX):

On the PAUSE ⏸ screen, hold BOLUS 🎵 until a beep occurs.

REVIEW PROGRAMMING (RX):

On the PAUSE ⏸ screen, press BOLUS 🎵 .
Note: *The first time the RUN/PAUSE ⏯ is pressed after programming or a Patient Lock Out is added, the programming (Rx) will be displayed for review.*

CASSETTE PRIMING

1. Connect the cassette to the Medibag/IV bag using the short tubing line.

2. Gently squeeze the Medibag/IV Bag forcing the air bubbles from the bag and local into the tubing/cassette.

3. Remove the orange protective cover from the bottom of the cassette.

4. Once primed snap the cassette in place, preventing free flow.

5. Either by hand or using the orange protective cover on the bottom of the cassette spin the silver dot one full rotation.

ALARMS

DISPLAY	SOUND	ALARM	TO CLEAR
🔔 + OCL	Constant Beeping	Occlusion Alarm	Press the RUN/PAUSE button to silence the pump and again to restart the pump. If unable to clear, call the clinical support line.
🔔 + MA	Constant Tone	Cassette not attached	Press the RUN/PAUSE button to silence the alarm. Then ensure the cassette is properly attached and resume the infusion.
🔋	5 short beeps every 4 minutes	Low Battery	Replace the batteries as soon as possible.
🔔 + 🔋	Constant Tone	Dead Battery	Press the RUN/PAUSE button to silence the alarm. Replace the batteries immediately, the current program will resume once it's restarted.
🔔 + MA1	Constant Tone	Malfunction	Press the RUN/PAUSE button to silence the alarm. Double check the cassette.
🔔 + MA	Constant Tone	Malfunction	Press the RUN/PAUSE button to silence the alarm. Close the tubing clamp and check for kinks in the tubing and that the clamps are open.
🔔 + EEE	10 short beeps	End of pump life	Replace pump to continue or start therapy. **Preset pump only**
